Patrick Ordish

Freelance eLearning Developer

Manchester, UK | Remote project and overflow support
itspatrickordish@outlook.com | paddyordish.github.io

Profile

eLearning developer with two years' experience at Nucleus Technologies, creating and supporting online training for UK trade associations and professional bodies. Available for freelance course production, PowerPoint conversion and multimedia support.

Core skills

Course production: PowerPoint conversion, Rise, Storyline and assessments
Delivery and support: SCORM 1.2 / 2004, LMS testing and troubleshooting
Multimedia: Instructional video, narration integration and HTML5 activities

Professional experience

Nucleus Technologies | eLearning content and LMS support

Current role | Two years' experience

- Build courses in Nucleus LMS from supplied briefs, with courses priced at up to £1,000. Develop assessments, certificates and supporting multimedia assets.
- Publish and upload SCORM packages; support course access and learner journeys.
- Investigate enrolment and completion issues; document reproducible faults for developers and coordinate resolutions with clients.

Fullset Products | Founder and content creator

Produced more than 50 product demonstrations and educational videos. Planned, presented, filmed and edited content, created graphics and repurposed footage for social media.

Selected portfolio projects

Customer Call Practice | PowerPoint to Storyline

Converted five slides into a narrated course with timed animations, reveals and quiz feedback. Published SCORM 1.2; tested LMS launch, interactions and completion reporting.

FIELDWORK 001 Ladder Safety | Custom HTML5

Built an interactive inspection course with magnifier activities, recorded narration and transcripts using an AI-assisted HTML5 workflow. Tested SCORM 2004 delivery in an LMS.

Warehouse Operative Level 2 | Rise 360

Created a structured portfolio module with clear visual layouts and knowledge checks.
